3/1/77

Dear Mr. Naranjo,

What you say about Post Mortem and my appearance on the Lou Gordon show mean much to me. I thank you for these kind words.

On Ray there are some things that are confidential. I can now say nothing about others until they are all put together. I prefer not to make ~~xxxxxx~~ piecemeal disclosures. However, if you have not read Frame-Up the case for him and against the government is set for th there.

Filing FOIA actions against the Archives and doing it responsibly is not easy. First you must want something that is not withheld, then it must be available under the Act and noe immune under some exemption and then, of course, you must be prepared to go to court after exhausting your administrative remedies without getting what you seek.

It is not possible to counsel you on this, especially when I am not a lawyer.

However, you have to begin with a request. Do not do it unless there is a record you really want. If you do you will become a statistic in the campigh to gut the Act.

If you want to I suggest that you begin by obtaining a copy of the Act and the A.G.'s memo on it, probably available through your Congressman or Senator.

It is not possible for me to make and mail copies of the records I obtain simply because I do not have time to do the work in which I'm engaged. Once I force it out this information is available to all from the agencies, like the Archives. In addition, to make all available to everyone, I have begun to deposit these records in the University of Wisconsin system. As of now this is little more than a token deposit but all my records will be there, now about 20 file cabinets of them.

I hope you can understand that if I followed any other course I'd be doing nothing else and not getting any work done.

Who is running America? The same bureaucrats, I think.

Sincerely,
